ORWDPS1 SCHALL

Description: This RPC retrieves the ward medication administration schedule.

Input Parameters:

DFN (R): Pointer to the Patient file (#2) obtained when the patient is selected.

locationIen: Obtained when the Visit location is selected. However, CPRS passes 0 for the locationIen.

If a >0 locationIen is passed, there are duplicates, and there is a location specific schedule, the location specific take precedence.

If there are no location specific schedules, the lowest schedule IEN takes precedence.

If a 0 locationIen is passed, the lowest schedule IEN takes precedence.

Output Parameters: A subset of orderable items based on the XREF passed to the RPC.
